## **PROFESSIONAL SUMMARY**

ETQ Reliance Consultant and Developer with 4+ years of experience implementing, configuring, customizing, administering, and supporting Enterprise Quality Management System (eQMS) solutions. Experienced in ETQ development, workflow automation, ETQ scripting, SQL, administration, production support, release management, data migration, Computer System Validation (CSV), testing, troubleshooting, and system integrations. Skilled in translating business requirements into scalable ETQ solutions while collaborating with cross-functional stakeholders to deliver reliable, compliant, and high-quality enterprise applications.

## **PROFESSIONAL EXPERIENCE**

### **Tata Consultancy Services (TCS)**

Systems Engineer – ETQ Reliance Consultant & Developer

February 2022 – Present

#### **ETQ Reliance Development & Configuration**

- Configure, customize, administer, and support ETQ Reliance solutions for enterprise Quality Management processes.
- Configure ETQ Forms, Workflows, Apply Business Rules, Validations, Embedded Views, Views with Custom Columns, Develop EtQscript for custom enhancements.
- Configure and support integrations using REST APIs, Web Services, Connection Profiles, and Task Profiles to enable seamless data exchange between ETQ Reliance and external enterprise applications.
- Deliver enhancements across CAPA, Document Control, Audit Management, Change Management, Customer Complaints, Management of Change (MOC), Supplier Quality, Enterprise Risk Register, and Sustainability modules.

#### **Application Support & Consulting**

- Provide production support by troubleshooting application defects, resolving user issues, performing root cause analysis, and meeting SLA commitments.
- Support multiple enhancement initiatives while balancing production support and changing business priorities.
- Collaborate with business users and technical stakeholders to understand requirements and implement ETQ configurations, application enhancements, and integration solutions.
- Monitor ETQ application health, investigate recurring production issues, and recommend practical solutions to improve business processes while ensuring compliance and application stability.

### **Data Migration & Validation**

- Support ETQ migration activities including data cleansing, data validation, reconciliation, and issue resolution.
- Execute SQL queries for troubleshooting, reporting, validation, reconciliation, and data analysis.
- Validate migrated data to ensure accuracy, completeness, and compliance with business requirements.

### **Testing & Validation**

- Perform Smoke, Functional, Regression, Integration, and User Acceptance Testing (UAT).
- Support Computer System Validation (CSV) through test execution, validation documentation, change control, and validation of application enhancements before production deployment.

### **ETQ Administration**

- Perform user provisioning, security configuration, access control, role management, lookup maintenance, and master data administration.
- Support Development, QA, UAT, and Production environments, promote configurations between environments, validate deployments after migration, coordinate releases and production deployments, monitor application health and system performance.

### **Release & Deployment**

- Participate in deployment planning, release management, migration activities, upgrade validation, environment verification, configuration changes, business rule updates, and post-production support.
- Prepare technical documentation, release documentation, implementation checklists, and support procedures.

### **Technical Skills**

ETQ Reliance: Configuration, Development, Administration, ETQ Scripting, SQL | Database: MySQL | Testing & Validation: Functional Testing, Regression Testing, Integration Testing, User Acceptance Testing (UAT), Computer System Validation (CSV) | Tools: ServiceNow/Jira

### **Education**

Bachelor of Engineering (Mechanical Engineering) - Jain College of Engineering (CGPA: 8.32/10)  
Diploma in Mechanical Engineering - Maratha Mandal Polytechnic (76%)
